

Content Proposal

Prepared by: Jimmi Ellis

Goal: Provide your company with relatable UGC, short-form video content that helps homeowners understand your mini-split ac is easy to install, effective in high temperature climates, such as Las Vegas, and is a complete mini-split option.

Multipurpose - content can be repurposed on all of your social platforms.

Why this matters

Your company already has strong product advantages and some good reviews however homeowners, and DIYers still need the product explained:

“Will it work in Vegas heat?”

“Can I really install it myself?”

“How is it different from other mini-split brands?”

“Helpful info on your products warranty and support?”

This is where short-form video can help your company!
