

Content Proposal

Prepared by: Jimmi Ellis

For: Mountman

Goal: Provide Mountman with relatable UGC, short-form video content that helps homeowners understand that Mountman is easy to install, effective in high temperature climates, such as Las Vegas, and is a complete mini-split option.

Multipurpose - content can be repurposed on all social platforms.

Why this matters

Mountman already has strong product advantages and some good reviews however homeowners, and DIYers still need the product explained:

“Will it work in Vegas heat?”

“Can I really install it myself?”

“How is it different from other mini-split brands?”

“Helpful info on Mountman’s warranty and support?”

This is where short-form video can help.
